This text explores the scientific principles and methods that underline the cause, detection, measurement, and prevention of metal corrosion problems in engineering practice. It considers the effects of corrosion on abrasions, erosions, weldings, and metallurgical structures and discusses how to prevent corrosion by alloy selection, cathodic protection, inhibition, and

Corrosion is a galvanic process that can be prevented using cathodic protection. The deterioration of metals through oxidation is a galvanic process called corrosion.

Protective coatings consist of a second metal that is more difficult to oxidize than the metal being protected.
