PHILOSOPHY OF RESEARCH METHODOLOGY

This section deals with the philosophy of research and research methodology.

Methodology underpins all the work you do. These are important concepts which need to be understood, but they're one of the areas people find most challenging, so don't worry if they don't sink in right away.

From a phenomenon should be gathered, analysed and used. The term epistemology (what is known to be true) as opposed to doxology (what is believed to be true) encompasses the various philosophies of research approach.

Chapter Three: Research Methodology

Research philosophy is an important part of research methodology. Research philosophy is classified as ontology, epistemology and axiology. These philosophical approaches enable to decide which approach should be adopted by the researcher and why, which is derived from research questions (Saunders,

Understanding research philosophy - Project Guru

Interpretive research approaches are derived from research philosophy that is adopted.

According to Dumke (2002) the two main research approaches are deductive and inductive. The inductive approach is commonly referred to when theory is derived from observations. Thus, the research begins with a specific observation and measures.

(PDF) The philosophy of quantitative methods

Philosophy of Qualitative Research Philosophy of qualitative research is “interpretive, humanistic, and naturalistic” (Creswell, 2007). It places significant importance to the subjectivity. The ontological assumption is that there is no single reality but encompasses multiple realities for any phenomenon (Speziale & Carpenter, 2003).

Research Methodology | From Philosophy of Science to ...

Choosing an appropriate research philosophy is an important part of the research methodology. In fact as Guba & Lincoln, (1982) have propounded, philosophical paradigm within research hold utmost importance, as it is the “basic belief system or world view that guides the investigation” (p. 105). The term philosophy in research refers to the development of knowledge and the nature of that knowledge.
